

Celebrating 10 years of logistics management consulting Company anniversary of Dr. Acél & Partner AG

Erschienen: Deutsche Fassung Technika 05/2006

Ins Englische übersetzt von Dr. Acél & Partner AG

Verfasser: Dominique Graf

Dr. Acél & Partner AG celebrates its 10-year anniversary this year. The company, which provides international counselling services for logistics management, has already been awarded twice for its excellent performance by the Swiss magazine "Bilanz".

Services provided by Dr. Acél & Partner AG focus on logistics as well as production and organisational management. The company is active internationally, focussing on the Swiss, German and Austrian markets. In these countries, Dr. Acél & Partner AG boasts a long-standing and therefore time-tested network of cooperation with various partner firms and institutions.

Its clients are active in the industrial, commercial, transport and services sectors. To quote just a few examples, Dr. Acél & Partner AG implemented a simulation of landing flap manufacturing for the Airbus groups' Bremen plant, patient planning in the operating-room area for the Schulthess Klinik in Zurich or the distribution process in the canton of Ticino for the Manor department store.

Dr. Acél & Partner AG is the official successor organisation of the "Stiftung BWI" (Foundation for Research and Consulting at the Center for Enterprise Sciences) of the Swiss Federal Institute of Technology in Zurich (ETHZ). The foundation on its part originated from the "Betriebswissenschaftliches Institut", the ETH's former Institute of Industrial Engineering and Management (BWI). Dr. Acél & Partner AG currently has a staff of 12 employees, 10 of which are consultants, and is a member of several professional associations such as ASCO (Swiss association of management consultants).

In 1999, Dr. Peter Acél was awarded the "Certified Management Consultant" designation of the US Institute of Management Consultants (IMC USA). In the same year, the "Bilanz" awarded the company for their top services in production and logistics and, a year later, Dr. Acél & Partner was named best consultant in logistics by the Swiss economic magazine.

Dr. Acél & Partner AG organises technical seminars and conferences on a regular basis. Among these is the "Impuls Apéro" in spring, and the Logistics Colloquium, which is held with the ETH in autumn. Guest speakers discuss trends in logistics and production and organisational management at these events, providing practical insights through concrete case studies.
